	1501	THE PARTY IN LEGISLE	

Continuation of 11. does NOT place the application in condition for allowance because: The Applicant argues that the combination of the teachings of Bonomi and Knuth is improper since the Applicant argues there is no proper motivation within Knuth to combine the teachings of the references. The Examiner respectfully disagrees, especially in view of the cited prior art and the knowledge of one skilled in the art as noted on page 6 of the FInal Rejection mailed 22 December 2006. One of the basic requirements for a prima facie case of obviousness is there must be some suggestion or motivation, either in the references themselves or in the knowledge generally available to one of ordinary skill in the art, to modify the reference or to combine reference teachings. As shown previously, one of ordinary skill in the art has knowledge of a circularly linked list as taught in Knuth as a basic data structure. The Applicant's arguments regarding the age of the Knuth reference is also not persuasive. Knuth is used to demonstrate the knowledge of one of ordinary skill in the art and that the knowledge of circularly linked lists is well known and used in the art. One of ordinary skill in the would have been motivated to combine the teachings of Bonomi and Knuth since one of ordinary skill in the art has knowledge that circularly linked lists are used as a data structure so that there appears to be no beginning or end to the linked list and may be entered at any point, which is also shown in Knuth (see page 270 as previously cited). So, Knuth also provides motivation for combining the circularly linked list with the teachings of Bonomi. Also, since both Bonomi and Knuth are directed to traversing linked list or queues, there would have been a reasonable expectation of a successful combination of the teachings of Bonomi and Knuth. Therefore, the Examiner has established a proper prima facie case of obviousness. The Applicant has failed to provide any persuasive evidence for nonobviousness and/or provided any persuasive arguments for nonobviousness after the Examiner has established a prima facie case of obviousness. See MPEP 2142. Also, the Examiner submits that the Examiner's duty to explain why the combination of the teachings is proper has been fulfilled. See MPEP 2142 and Ex parte Skinner, 2 USPQ2d 1788 (Bd. Pat. App. & Inter. 1986). Therefore, the combined teachings of Bonomi and Knuth teach the claimed invention and the claims are not in condition for allowance.
